EMPLOYMENT HISTORY

2022 🔖 **Cubics Technology, Frontend Developer**
I have worked as an intern Frontend Developer at Cubics Technology company for 3 months. My job involved building projects such as quizzes, social media platforms, movie websites, e-commerce systems, chat and delivery services. Working on different projects every day helped me gain significant experience in this field.

PROJECTS

- Marvel
Built a site on Marvel using HTML, CSS, SCSS and vanilla Javascript where you can find information about Marvel characters, movies, games, comics and accessories.

  https://marvelworld.netlify.app

- Siimple
Fully responsive landing page created with React.js and TailwindCSS.

  https://siimple.netlify.app

2019 - 2023 🔖 **Baku State University, Computer Science** - Bachelor

CERTIFICATIONS

🔖 **Code Academy** - Software Development

🔖 **DevEducation** - Backend Development

ABOUT ME

I am a self-motivated and creative programmer who enjoys constantly improving myself. I can quickly adapt to new technologies and work effectively with them. I love solving complex problems with my analytical thinking and problem-solving skills. Through my experience, I have strengthened my ability to solve problems and work with teams, allowing me to successfully tackle new challenges.
